

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE.

THIS book is intended for the help of those who, not being Arabic or Persian scholars, would like to know something about the Oriental coins which may come in their way, as well as of others who with a knowledge of these languages find difficulties in the lettering, arrangements, and reading of the legends, which are often so different in these respects from the plain writing of a MS. or the print of a book, and in the meanings of marks and symbols which are to be found on coins.

It originated in notes, made during several years, in a copy of that valuable but now scarce book, "Elements de la Numismatique Musulmane," by F. Soret, Brussels, 1864, a reprint from *Revue de la Numismatique Belge*, ser. iv, tome ii. Considerable correspondence from India and at home, personal references made to me, and the remembrance of my own troubles when beginning to work at Oriental coins some years ago in India without much aid from books, have guided me as to what might be most usefully included in such a Manual as this.

The book will, I hope, be found useful, as one of ready reference, to Oriental numismatists generally, in the same way as Soret's has been to those who had a copy of it.

My thanks are due to Mr. Guy Le Strange and Mr. H. F. Amedroz for information regarding the location of some mint towns, and to the latter also for help in Arabic legends.

MUSALMAN NUMISMATICS.

THE ALPHABET.

ON Plates I and II are shown the letters of the Arabic alphabet in the various forms in which they appear on coins. In each column, on the left is the letter as written in Kufic on the coins of the Umayyad Khalifs, in isolate, initial, medial, or final form; and following it to the right are other shapes in which it appears, more or less in order of time and progress of change.

ا was at first a straight, even, perpendicular line of a height about double that of the ordinary letters. It has not much changed, except in showing a slight curve at the bottom and a broadening at the top. It may be joined to its preceding letter, but not to the one following, and is therefore in only isolate and final form. In ornamental writing the top of the letter is often curved over and lengthened into a curl or loop, and when the legend is arranged in arabesque or fancy pattern it is often misplaced from its proper position in the word, or slanting, or even omitted, an ا in another place doing duty for it also.

ب ت ث. The diacritical dots are often omitted (always so in the Kufic); there is then nothing to distinguish these letters from one another, or from ن and ی in the initial and medial state. In Persian there is also the letter پ, and in Hindustani the ت, or, as it is more often written on coins, ط; it is so found on some of the coinage of Indian native states bearing the name of Queen Victoria, وکٹوریا.

ج ح خ and in Persian چ. These letters are also to be known from one another by their dots; they are subject, as will be

seen, to many variations of form, and may sometimes be mistaken for ع or غ.

د in Kufic are very like ظ ط ض ص and ک, but as a rule the upright limb is shorter than in the ک and the body is open on the left side instead of closed as in the ص. On coins of later date the د is sometimes so thin as to be almost a ر, and at other times approaches in fatness to و.

ر ز final are sometimes very like ن final. In Hindustani there is a letter ژ or ر.

س ش do not present much difficulty when in this form, but when the upright limbs or 'teeth' are replaced by the sweeping curve of Persian *talik* writing, in the middle of a word it may be read as ن ت پ ب or ی.

ظ ط ض ص are troublesome in Kufic, as mentioned above under د. They are subject to a good deal of variation in form.

غ ع as initial or final may be mistaken for ح خ.

ف ق must not be mistaken for م medial or و, nor as initial for غ ع. The loop in medial is above the line (ء) instead of below, as in ه.

ک has many varieties, and in Kufic is very like د and ص, as mentioned above. In Persian and Turkish there is also the letter گ or ک.

ل can almost always be known from ا by the curve to the left at the bottom, or in Kufic a short rectangular turn.

م has many forms. Sometimes it may be confused with ق ف or ع medial, or ب and ح initial, or in one form for ه or ه.

ن final has many variations; may easily be mistaken for final ر.

س has many forms, but is usually easily made out.

و is sometimes like ق ف, at other times like م, and more rarely like د.

ی final or isolate is usually distinct, but medial or initial without dots is not so.

لا is represented in such a variety of forms that an assortment of them is given on the Plate.

غ ng and ف p are used in Malay-Arabic writing only.

For reading Kufic coins, which have no diacritical dots, the following hints may be useful. The mint name and the date are the only parts as a rule which require attention. The mint names all begin with the preposition ب, 'in' or 'at.' If the second and third letters are both equally about double as tall as the initial ب, they are probably ال 'the'—there are but two or three mint towns beginning with ال. In that case the next letter will be the initial of the name, which, having been made out, simplifies matters much, as one can then get the help of the 'List of Mint Towns.' If the second and third letters be not ال, then the second is of course the initial of the mint name. Two short upright strokes will probably be ت ب or ن with a following ي; often the stroke for ي is a little taller than for the other three letters. Three short upright strokes in succession are most likely ش س; four, ن ت ب and ش س or ي before or after it—the three strokes of the س are usually just a little shorter than the one before or after it. Doubts as to ك ط ص د may often be cleared away by looking at those letters where they occur in known words in the legends on the same coin, such as هذا, ضرب, ليظهره, شريك, and in the same way comparison may be made if needed with the م and و. A final ن can very often be found in one of the words of the date to clear up a doubt between it and ر. In reading the dates care is needed not to mistake اثنين (one long, three short strokes), ثلث (one short, one long, one short), and ست (four short). سبع and سبعين should have the fourth stroke rather taller, تسع and تسعين the first stroke taller than the others; but there is sometimes so little difference that it is hard to tell which is meant. خمسين and تمنين are sometimes much alike, but if the strokes after the م can be counted, that will decide as to which numeral it is, for in the former there are five and in the latter but three.

NUMBERS AND CIPHERS.

The dates of striking are almost always given on Musalman coins, in words or in ciphers. Until the seventh century of the Hijra we find the former only, but after that ciphers came gradually into use, so that by the beginning of the ninth century they were generally adopted. The earliest dates in cipher are on Urtukid coins, e.g. ٦١٢ on a coin struck at Amid. Sometimes we find the date given both in words and ciphers, or partly in words and partly in ciphers; e.g. on a coin of the Golden Horde, سبعین for а.н. 770. The number is usually expressed in the feminine form, but sometimes in the masculine. The conjunction و is almost always used, e.g. تسع و سبعین و مئة, but occasionally omitted. Reference has already been made to difficulties in reading some of the numbers in the Kufic writing. The same will be found often on coins of a later time, especially with regard to seven and nine, as sometimes there is no difference between the height of the ب or ت and the teeth of the س, but then the spacing usually indicates, thus سبعین, تسعین. The following is a list of the numbers.

The Arabic ciphers, in varying forms in which they appear on Muhammadan coins, are given on Plate II. They are often ill-formed, and require a practised eye to read them. The | may be out of place, slanting one way or the other, or mixed up with neighbouring lettering. ʾ may have its horizontal arm shaky, and so look like ʾ. ʾ sometimes has its arm so irregularly formed as to be taken for ʾ. ʾ has more variety of shape than any other cipher, and in one of its forms is the same as one variety of ۵. The form ۶ is used on Turkish and African coins. ۵ has many forms too, but usually it is either ۵ or ۶. The ۵ is sometimes too small, and therefore like a figure used for 0. ۶ may have its arm at an acute angle and so be taken for ۷, or be reversed to ۶, or have its arm rounded and nearly closed at the top and so be like ۹. ۷ and ۸ are usually pretty distinct, but sometimes they slant a good deal, even to the extent of lying on their sides; in that case they may be taken to have fallen over to the right, so that < is ۷ and > is ۸. ۹ may be like a ۶ if not closed at the top, and is not rarely reversed, i.e. with its ring to the right. When ten is indicated by · it is not always visible, and when ۰ is used there is a doubt sometimes from its size whether 5 or 0 is intended.

Dates expressed in ciphers are read from left to right, except those on the coins of Maisur (Mysore), which, as in Arabic writing, are written from right to left. But sometimes the whole date is by mistake reversed, e.g. ۶۸۷ for ۷۸۶ on a coin of the Golden Horde, and sometimes with the further error of the ciphers being reversed, e.g. ۶۸۷ for ۷۸۶. Sometimes, too, the ciphers are not placed in order in a line, but distributed in the area of the coin, e.g. ۶ ۸ ۷ on coins of Shahs of Persia. Generally, however, in any of these cases there is not much difficulty in discovering the error or in seeing the proper order of the ciphers, as one can tell from other signs what is within a century or so the age of a coin.

DIACRITICAL MARKS.

These are, as has been mentioned, almost always omitted on Kufic coins; on later ones they are found irregularly—generally there were none or only a few until comparatively modern times. When given they often do not help much in the reading of the legend, from being placed not immediately above or below the consonant of which they form part; and on coins which are ornamented, as many are, by dots and groups of dots, it is not easy to tell which are for use and which are for decoration; a difference in size or shape, will, however, often indicate this. The vowel marks are almost always omitted as in ordinary writing. The two dots indicating the ت or ي are sometimes placed like a colon (:), and the groups of three in ش چ پ may be arranged in a line (...). On the Kufic coins there are 'points' above or below certain letters in the legends which seem to be marks of genuineness or engravers' marks, although they are often the correct diacritical ones for the letter near which they are placed.

ISOLATED LETTERS AND WORDS.

In the areas of Arabic coins, sometimes above, sometimes below the legend and not forming a part of it, are often found letters or words, the signification of some of which has been a good deal discussed. If it be a name, it is in all probability that of a governor, vizier, or moneyer, but more often it is one of the words or initials given in the following list, being marks of genuineness or mint marks, indicating goodness of weight or fineness of metal. The list is compiled from one made by E. Meir, with a few additions of other writers. It will be seen that a single letter is in some cases given to denote a word, e.g. س for سلم and سلام and عدل, ع, ه for هزب, ت for تم. These are very common on the coins of the Abbaside period.

**ORIGIN OF TYPES OF COINAGE AND THEIR
SUBSEQUENT VARIETIES.**

At the time of the rise of the power of the early Khalifs, the coinages of the regions which were brought under their rule were, speaking generally, the Byzantine in the West and the Persian Sassanian in the East. At first, following the usual practice of Oriental conquerors, the new rulers made use of that which was the currency of the country, altering the coins by degrees to be indicative of the new ruling power and religion, but making the changes so gradually as not to give an unfamiliar appearance to the coins in the eyes of the people, but to preserve the continuity of the accustomed coinage with only such changes as were necessary. Thus we see in the earliest gold of the Khalifs an imitation of the coin of the Byzantine emperor adapted by the figure of the Khalif with a sword in his hand being substituted for that of the emperor holding a staff with a cross on it, on the obverse; and on the reverse the cross, standing on four steps, altered into a column with a ball on its top. The legends on both sides are changed to Arabic ones in Kufic character :

بسم الله لا اله الا الله وحده محمد رسول الله
بسم الله ضرب هذا الدين سنة ست وسبعين

Similarly the silver coins of the last Sassanian king were altered by the additions of crescents and stars and بسم الله on the margins, and later by the name of the governor of the province being added in Kufic in the area. So, too, the Byzantine copper of the M variety of Heraclius had small additions of Arabic Musalman words on them. Others in copper of the same type as the gold above mentioned were also struck.

Then when the Khalif Abd-al-Malik in A.H. 76, in compliance with the rule of the Prophet which prohibits the making of representations of living things and declares that every painter is in hell-fire, established the first purely Musalman coins, he still preserved in them a semblance to the gold Byzantine and silver Sassanian, in size, form, and general appearance. Mr. C. F. Keary, in an article in the *Numismatic Chronicle* for 1885 and 1886 on "The Morphology of Coins," shows that the reverse of a coin of Khusru II, turned a quarter round, at a little distance seems almost identical with one of Abd-al-Malik, struck at Basra A.H. 79; but, looking closer, one sees that the two figures with a fire altar between them on the former are replaced by three lines of Kufic Arabic on the latter, and the marginal Pehlvi legend altered to a Kufic one also. But the marginal circles are preserved almost intact, and the crescents and stars on the one have changed to corresponding annulets in the other.

There was little variation from this type in the coinage of the Umayyads of Spain, the Abbasid, Buwayhid, Samanid, Hamdanid, Ukaylid, and other dynasties in Irak and Yaman up to the times of the Mongols, but in Africa the Aghlabis, according to Mr. Keary, whose "Morphology on Coins" supplies the substance of these paragraphs, founded their currency in both gold and silver on the pattern of the gold coins of the Abbasid. The Fatimis followed the Aghlabis with the development of a new variety, i.e. coins which have their inscriptions arranged in a series of concentric circles. Their successors, the Ayyubis, adopted at first the same pattern, but later changed it to a plainer form in straight lines, and this form was continued without much change by the Mamluks. In about the beginning of the sixth century A.H. the enclosing of the area legend in a compartment came into use—squares, star-shapes, circles, ovals; 4, 6, and 8 foils, etc. This is noticeable in the Ayyubid, Saljuk, and especially in the Mongol series.

There was a remarkable departure from the Musalman type in some of the coinages of Asia Minor and Syria—Ayyubid, Saljuk, Urtukid, and Zangid—in reverting to imitations of Greek, Seleucid,

and Roman coin obverses ; heads and busts, and full and half figures of men ; horsemen, eagle, lion and sun, centaur, etc. This, no doubt, arose from a desire to adapt the coinage to that current in the neighbourhood and in use in the trading transactions with the West.

The coinage of the Mongols of Persia followed much the same pattern as that of the dynasties which they supplanted, and the same character was continued up to and throughout the reigns of Timur and his house.

But in the farther East there was an altogether different initial type—the Bactrian, from which sprang the coins of more solidity and thickness developing into the rupee. The two great coinages of the Muhammadan world of modern times show a marked difference suggestive of varying original types, more so perhaps a century ago than now. Compare, for instance, a gold or silver coin of Nadir Shah of Persia with one of Sultan Mahmud I, his contemporary in Turkey.

LANGUAGES.

Arabic is the language generally used on Musalman coins, but Persian is that which is usual on the coinage of the Shahs of Persia, the kings and emperors of Dehli, native Indian states, and the East India Company, mixed in the cases of the two last-named with some Sanskrit or vernacular words, and Malay on coins of that region.

In this book all legends in the Arabic character are taken into consideration, for although some coins bearing them were not issued by Musalman rulers, and so should, strictly speaking, perhaps be excluded, yet all with Arabic lettering upon them were issued for the use of, or to be read by, Muhammadans, by whom alone that character is used, or were imitations of Musalman coins. It is convenient to thus arrange Oriental numismatics into Musalman, Chinese, and Hindu.

But there are many bilingual and some trilingual coins which are specially interesting in an historical way, and should be considered. As has been said above, the earliest Musalman coins were copied from Greek-Roman and Sassanian ones, with Arabic additions; they are therefore bilingual, having in the former series Greek and Latin, and in the latter Pehlvi legends, the Arabic additions being either pious phrases or translations of the mint names or some words indicating genuineness. There are also some early African imitations of the Byzantine coinage with Latin legends, which have been read as "Non est Deus nisi Deus et Alius non est" and "In nomine tuo, Deus Omnipotens"; these were followed by others having on them the Kalima in Arabic, at first in part, afterwards entire.

The coins of Tabaristan, a detached province of the Persian Empire, were of a slightly different module to those of the Sassanian proper, although of the same type, being smaller and

finer with Tabaristan upon them in Pehlvi. After the conquest of the province by the Arab Musalmans, governors were appointed whose names are to be found upon the coins at the side of the Sassanian king's head, written in fine Kufic : سليمان , سعيد , عمر , مقتل , هانى .

Of Northern India at the end of the third century (Hijra), there are coins of the horseman and bull variety, with Sanskrit on one side over the bull and the name of the Khalif المقتدر on the other above the horseman. The same type was used by some of the Ghazni kings, and also later by the early Pathan kings of Dehli.

As early as A.H. 660 a coin of Khubilay Khan was struck at Bukhara with Chinese on one side and Arabic on the other, and there are coins of the time of the Muhammadan rebellion in China in the last century which are also in both these languages.

The Norman kings of Salerno and Sicily, who drove out the Saracen chiefs from those regions in the seventh century (Hijra), issued Arabic coins in imitation of some of the Ayyubid, but with a Christian formula of faith in imperfect lettering which might easily deceive their Muhammadan subjects. In the same way Alphonse VIII of Spain struck coins on which were in Arabic the ascription to the Holy Trinity and the declaration that he was the Amir of the Catholics, and the Pope the Imam of the Church of Messiah.

Georgia, from its position, was overrun by invaders from the north and south at all times, and its coinage shows a strange variety, of bilingual character, in consequence : at one time imitation of Sassanian, at another Byzantine with Greek and Georgian, at others Georgian and Arabic, and in the time of the Mongol power, Georgian, Arabic, and Mongolian.

Mongolian writing is also seen intermixed with Arabic on many of the coins of the Mongols of Persia.

Armenia was in much the same position as Georgia with regard to exposure to invasions. Its coinage, with the Christian king on one side and a lion on the other, with Armenian marginal legends, was, during the time of subjection to the Saljuks of Asia

Minor in the seventh century (Hijra), changed into one having on one side the figure of the king and Armenian legend, and on the other side Arabic legends similar to those on the contemporary Saljuk coins. Also when a little later the Mamluk Sultan Nasir al-Din Muhammad raided Armenia, he overstruck the Armenian king's coins with his own coin dies : an unusual proceeding for an Oriental king.

In India, some of the later Dehli kings, as well as the earliest before referred to, used the Devanagari characters on their coins as well as Arabic, and the last kings of the dynasty had their names on coins in the same characters as did also kings of Bengal.

M. Drouin quite lately discovered a Sanskrit legend upon a gold coin of Akbar.

Many native states of India have bilingual coins, partly in Persian, partly in the vernacular of the state, and sometimes partly in English. The East India Company issued bilingual, trilingual, and even multilingual coins using English, Persian, Hindustani, Bengali, Tamil, and Telugu. In the Straits there are Company coins with English, Persian, and Malay legends, and one with Chinese in addition to these three.

The Netherlands Government issued coinage for their states with Malay reverses to the obverses of the European pattern.

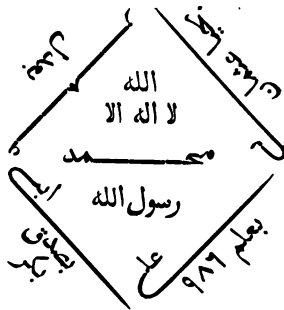

The Portuguese, although in other ways very ready to imitate the coinage of their neighbours in India, never used the Arabic character. The French, on the other hand, imitated the Dehli coinage as closely as did the English.

ORNAMENTATION.

The ornamentation of Musalman coins lies chiefly in the lettering, the arrangement and grouping of the inscriptions, and the shapes and arabesque outlines of the spaces in which parts of the legends are enclosed. This is seen at its best probably on the Hafsidi and other Moorish, the Persian Mongols (Uljaitu and Abu Said), and the Safavi of Persia (Ismail I and Tahmasp I) coinages. On the later Persian and Dehli coins, too, it is fine. The Persian style of writing lends itself well to this in curves, graceful sweeps of the pen, and prolongation and grouping of the letters. One very common practice is to prolong the tail ـ the full breadth of the coin, and to stretch a ب or ت right across so as to make them as dividing strokes between the lines of the legend. The word على , so important in the Shiah formula, is a favourite one for using in this way: for instance, on coins of Tahmasp I of Persia, in the way which Mr. Poole called the mill-sail pattern, where it forms the four arms of the sail-wheel with the names of the eight other Imams two by two between them, the junction

TAHMASP I OF PERSIA.

AKBAR OF DEHLI.

of the four initial letters forming a rosette in the centre. On Dehli coins, too, the names and attributes of the four orthodox Khalifs are used in somewhat the same way to form the sides of

quadrangular areas. The Kufic character also is used to form the square geometrical pattern in which the Kalimah is arranged on the pretty bilingual coins of Abu Said, the Persian Mongol. ʃ

Interspersed commonly on the coin areas are dots in groups and singly, annulets, rosettes, sprigs of flowers, knots, and so on. There are, however, certain figures called tamghas which seem meant to be the signs of particular dynasties or persons or countries. It is hard to describe in words many of them, or to say what they are intended to represent, or in what they originated. Some, as on the gold coins of Great Saljuks, are at the top of the area; others, as on the large Urtukid copper coins, are at the side or bottom. Some suggest an imitation of a monogram on a Greek or Parthian coin; others, as the fleur de lys on the Mamluks and the thunderbolt on the Great Kaans coins, are recognizable, as is also the double-ended trident of the Golden Horde. The curious figure in the centre of the area of the Chagatai coins, somewhat like the Greek letter Φ, has been thought to be the Tibetan letter *cha* inverted, the initial of Chagatai.

The representations of animals are numerous, and made in all times. They are sometimes indicative of a place, or peculiar to a person or dynasty, as the double-headed eagle on Urtukid and Zangid, the lion on the Mamluk, the lion and sun on Saljuk and Persian Shahs, the fish, birds, and human figures on the Rasulid coins, and the many varieties on the autonomous copper coinage of Persia.

The coins of the later Moghul Emperors of Dehli and of the native States, struck in the same pattern, have almost always a symbol within the loop of a final letter on one or both sides. These are sometimes sufficiently peculiar to be indicative of a particular State or mint; such, for example, as the sun-face of Indore, and the curiously shaped dagger, like a pair of scissors, of Kutch; but more often the symbol is not peculiar to one State or mint. Prinsep, in his "Indian Antiquities," gives a plate with some 126 of these symbols on it, and attributes them to some extent; but there are many more than he describes, and some of

those which he attributes to one are also on coins of other States. These symbols on modern Indian coins being, in many cases, the only mark by which the currency of one State may be distinguished from that of another, it has been the endeavour of several Indian numismatists to reduce them to order and locate their use; but it is a very difficult matter, for many of them have been used by several States, and many States have used several symbols at different times, and local knowledge and tradition give but little help. The symbols, moreover, are not always mint-marks, but seem sometimes to have been used to indicate the issue or the year; for example, more than thirty different symbols are to be found on the coins of the Dehli Emperor Aurangzib, struck at Surat.

Perhaps, of all these Indian symbols, the one which is most remarked is the J.H.S. on coins of Kashmir. Two or three explanations or reasons for the use of this Christian monogram have been given, but no doubt it was expected to be a lucky symbol.*

The Tughra is peculiar to the Othmanli coinage. It is a monogram consisting of the Sultan's name and that of his father, of which the composing letters intercross and have their upright portions prolonged upwards, curled and twisted in such a way as to make an interlacement difficult to decipher.

* General G. G. Pearse, C.B., R.A., writes as follows:—"Whilst Lord William Bentinck was Governor-General of India, 1828-35, two very remarkable conversions to Christianity took place; one was of a celebrated Muhammadan Moulvie, the other of an equally celebrated Brahmin, by name Anund. These men were great controversialists, and their change of religion caused much stir and excitement. Anund died, leaving a son, Anund Messiah, a sharp, intelligent man, good-looking and full of energy, a very stormy petrel of a Christian, never so happy as when launching his Christian controversial arguments at the heads of Hindoos. In 1850 Anund Messiah was at the court of Maharaja Goolab Sing, of Cashmere. In the Spring of 1851, when I was Assistant-Commissioner of Hazara on the Cashmere frontier, Anund Messiah, who was passing through Hazara, came to pay his respects to me. I saw a good deal of him for a few days. With much delight he showed me the new Cashmere rupees of Goolab Sing, with the Roman letters J.H.S. conspicuously in the centre of the coins amidst the Persian. He said he had induced the wily, clever Dogra king to place these letters on his coins, assuring him that thereby he would please the British Indian Government, and would himself be favoured by fortune. Never was any Muhammadan who had somehow managed to make an unbeliever say the Kalima more delighted than was Anund with this little bit of work of his."

RELIGIOUS LEGENDS.

Some pious expression or religious phrase or formula is very general upon all Musalman coins. On the early Khalif ones there was nothing else, except the date and, on the silver, the mint; a little later the name of the king or ruler was given; then titles and other particulars about the king were added, displacing a good deal of the religious forms; so that when we come to modern times there is little of them left. On a modern Turkish coin, for instance, there is nothing in this way but *عز نصره*, and on a coin of the late Shah of Persia nothing but the names and titles, with mint-place and date.

These religious legends may be divided into (1) formulæ, or symbols as they are sometimes called; (2) verses or phrases taken from the Koran; and (3) pious expressions or ejaculations.

(1) Formulæ.

The formula 'Bismillah' is found very commonly on coins of earlier times, usually as the beginning of the legend referring to the striking of the piece: *بسم الله ضرب هذا الدينار*. But it is often, too, in other parts of the field or marginal legends, sometimes detached, but more usually prefixed to the Kalimah or other professions of faith such as are to be seen in the following list, and in that case the formula *بسم الله الرحمن الرحيم* is used as it is at the beginning of all Musalman books and writings. On coins of one of the Mongol kings of Persia, Arghun, and on some of Syria and Palestine, struck under Christian influences, there is substituted for it this formula: *بسم الاب و الابن و الروح القدس*: "In the name of the Father and the Son and the Holy Ghost, one God." The same formula is lengthened on coins of Alphonse VIII of Spain into: *بسم الاب و الابن و الروح القدس*: "In the name of the Father and the Son and the Holy Ghost, the one God; whose believeth and is baptized shall be saved."

The Kalimah.

The Kalimah (كلمة), literally 'the Word,' called also the 'Muslim Creed,' and in numismatic books generally the Muhammadan symbol or formula, is found on most of the coins of rulers holding the orthodox faith (Sunni). The first, or negative part of it, لا اله الا الله, is taken from the 47th surah of the Koran, verse 21; the second part, affirmative, محمد رسول الله, is in the 29th verse of the 48th surah: "There is no god but God, Muhammad is the Apostle of God" (Palmer's translation). The Kalimah is often followed by one or more of the 'Pious Phrases' given in the list below, such as the following: - صلى الله عليه وسلم - صلى الله عليه وعلى اله. The first part of the Kalimah is followed by other endings than the above: e.g., وحدة لا شريك له "who has no associate," the formula used on the early Khalif coins; الامر كله لله - الامر كله لله - عمل لقد اكله - الامر كله لله لاقوة الا بالله الايما غير الا من الله "who gives complete deliverance." The second part is varied as follows: محمد الامين رسول الله - محمد عبد الله ورسول - محمد رسول الله نبي رحمة الواحد - محمد رسول الله خاتم النبيين - محمد رسول الله. On a coin of a Sultan of Dehli the Kalimah is in this form: "I testify that there is no god but God, and I testify that Muhammad is His servant and apostle." On coins of rulers of the Shiah sect the Kalimah has added to it على ولي الله "Ali is the friend (or favourite) of God." This constitutes what is referred to in numismatic books as the Shiite formula.

Other Continuations of the Bismillah and the Kalimah.

صلى الله على سيدنا محمد واله واحد لا اله الا هو الرحمن
الرحيم

God bless our lord Muhammad, and your God is one; there is no God but He who is the compassionate, the merciful.

لا اله الا الله محمد رسول الله المهدي امام الامة

There is no god but God, Muhammad is the prophet of God,
the Mahdi is the Imam of the nation.

God bless Muhammad and his family, the good, the pure.

صلى الله على محمد وعلى اله وسلم تسليما

God bless Muhammad and his family, and peace be with them.

الله ربنا و محمد رسولنا والامام

God is our Lord, Muhammad is our prophet and the Imam.

The following Koranic sentences are also included amongst the symbols or formulary sentences of numismatic writers.

Kor. cxii, . الله احد الله الصمد لم يلد ولم يولد ولم يكن له كفوا احد
God is alone, God is eternal, He begets not and is not begotten,
nor is there like unto Him anyone.

This is called the Umayyad symbol.

[محمد] رسول الله ارسله بالهدى ودين الحق ليظهره على الدين
Kor. ix, 33. كله ولو كره المشركون

Muhammad is the prophet of God sent with guidance and the religion of truth, to make it prevail over every other religion, averse although idolaters may be.

This is sometimes called the second symbol.

لله الامر من قبل ومن بعد ويومئذ يفرح المؤمنون بنصر الله
Kor. xxx, 3, 4.

To God belongs the order before and after; and in that day the believers shall rejoice in the help of God.

The translation of the sentences taken from the Koran are those of E. H. Palmer, vols. vi and ix of "Sacred Books of the East."

(2) Sentences from the Koran.

Kor. xxxv, 31. الحمد لله الذى اذهب عنا الحزن ان ربنا لغفور شكور
Praise belongs to God, who has removed from us our grief;
verily our Lord is forgiving, grateful.

Kor. i, 1. الحمد لله رب العالمين
Praise belongs to God, the Lord of the Worlds.

اذن للذين يقاتلون بانهم ظلموا وان الله على نصرهم لتقدير
Kor. xxii, 40.

Permission is given to those who fight because they have been wronged, and verily God to help them has the might.

Kor. iv, 62. اطيعوا الله و اطيعوا الرسول واولى الامر منكم
Obey God, and obey the Apostle, and those in authority
amongst you.

افمن يهدى الى الحق احق ان يتبع امن لا يهدى الا ان يهدى
Kor. x, 36. فما لكم كيف تحكمون

Is then he who guides unto the truth more worthy to be
followed, or he that guides not except he be himself
guided? What ails you then, how ye judge?

الله لا اله الا هو الحي القيوم لا تاخذه سنة ولا نوم له ما في السموات
وما في الارض من ذا الذي يشفع عنده الا باذنه يعلم ما
بين ايديهم وما خلفهم ولا يحيطون بشئ من علمه الا بما شاء

Kor. ii, 256.

God, there is no God but He, the living, the self-subsistent.
Slumber takes Him not, nor sleep. His is what is in
the heavens and what is in the earth. Who is it that
intercedes with him save by permission? He knows
what is before them and what is behind them, and they
comprehend not aught of His knowledge but what He
pleases.

Kor. ii, 258.

الله ولى الذين امنوا

God is the patron of those who believe.

Kor. ii, 208, and iii, 32.

الله يرزق من يشاء بغير حساب

God provides for whom He pleases without count.

و بالحق انزلناه وبالحق نزل

In truth have we sent it down, and in truth has it come down.

و تمت كلمات يعلمون انه منزل من ربك بالحق فلا تكونن من

Kor. vi, 114, 115.

الممترين

The perfect words we know are sent down from thy Lord with truth. Be not thou, then, of those who doubt.

والذين معه اشداء على الكفار رحماء بينهم تراهم ركعا سجدا
يبتغون فضلا من الله ورضوانا سيماهم في وجوههم من اثر

Kor. xlvi, 29.

السجود

And those who are with him are vehement against the mis-believers, compassionate amongst themselves; thou mayest see them bowing down, adoring, craving grace from God, and His good-will; their marks are on their faces from the effects of adoration.

والذين يكنزون الذهب والفضة ولا ينفقونها في سبيل الله قذوقوا

Kor. ix, 34, 35.

ما كنتم تكنزون

Those who store up gold and silver and expend it not in God's way; taste, then, what ye stored up.

وعد الله الذين امنوا منكم واملوا الصالحات ليستخلفنهم في
الارض كما استخلف الذين من قبلهم وليمكنن لهم دينهم

Kor. xxiv, 54. الذى ارتضى لهم وليبدلنهم من بعد خوفهم امنا

God promises those of you who believe and do right that He will give them the succession in the earth as He gave the succession to those before them, and He will establish for them their religion which He has chosen for them, and give them after their fear safety in exchange.

Kor. xlvi, 40.

و الله الغنى وانتم الفقراء

For God is the rich and you the poor.

Kor. xvi, 55.

وما بكم من نعمة فمن الله

And whatever favours ye have, they are from God.

For we should not have been guided had not God guided us.

Kor. iii, 122.

وما النصر الا من عند الله العزيز الحكيم

For victory is but from God, the mighty, the wise.

Kor. iii, 96.

ومن يعتصم بالله فقد هدى الى صراط مستقيم

But whoso takes tight hold on God, he is guided into the
right way.

Kor. iii, 79.

ومن يبتغ غير الاسلام ديناً فلن يقبل منه وهو في الآخرة من
الخاسرينWhosoever craves other than Islam for a religion, it shall
surely not be accepted for him, and he shall be in the
next world of those who lose.

Kor. lxv, 2.

ومن يتق الله يجعل له مخرجاً ويرزقه من حيث لا يحتسب

And whosoever fears God, He will make for him a [happy]
issue, and will provide for him from whence he
reckoneth not.

Kor. lxv, 3.

ومن يتوكل على الله فهو حسبه ان الله بالغ امره قد جعل الله
لكل شيء قدراًAnd whosoever relies on God, He is sufficient for him ; verily
God will attain His purpose ; God has set for everything
a period.

Kor. xvii, 99.

ومن يهد الله فهو المهتد

And whom God guides he is guided indeed.

Kor. xvii, 84. وننزل من القرآن ما هو شفاء ورحمة للمؤمنين
And we will send down of the Koran that which is healing
and a mercy to believers.

ولو كره المشركون
Kor. ix, 33.
He it is who is sent with guidance and the religion of truth,
to make it prevail over every other religion, averse
although idolaters may be.

يا ايها النبي انا ارسلناك شاهدا ومبشرا و نذيرا وداعيا
Kor. xxxiii, 44.
Oh, thou prophet! verily we have sent thee as a witness
and a herald of glad tidings, and a warner and to call.

يا ايها الذين امنوا اصبروا وصابروا و رابطوا و اتقوا الله لعلكم
تفلحون
Kor. iii, 200.
O ye who believe! be patient and vie in being patient, and be
on the alert, and fear God, that haply ye may prosper.

NAMES OF GOD.

Instead of الله, or in addition to it, God is sometimes mentioned on coins by one or more of His other names or attributes. These names are called الاسماء الحسنی in the words of the Koran (xx, 7): "God, there is no god but He! His are the excellent names" (Palmer). By tradition there are ninety and nine 'excellent names' or 'comely names,' but there seems to be no certainty as to what those 99 are, as different writers give different lists. Mr. Redhouse, in an article in the Royal Asiatic Society's Journal, 1880, on "The most Comely Names," gives as many as 552, which he had obtained from various sources; from these have been gathered, in the following list, those which are the most often used, according to authors (Hottinger, Herklot, Meninski, Rogers Bey, Vratislas, T. P. Hughes), and usually found on talismans and amulets, for they are much used in that way.

THE FOUR KHALIFS.

The four orthodox Khalifs, Imams, or immediate successors of the Prophet, are **عمر - عثمان - علي**. Their names appear very commonly on coins, often arranged around the central legend or obverse area. Sometimes their لقب or title is also added. What these titles are will be seen from the following coin legends.

أبو بكر صدّيق عمر فاروق عثمان أبو نورين علي مرتضى

Abu Bakr the faithful witness, Umar the timid, Uthman the father of two lights, Ali the chosen.

The same, with the definitive **ال** prefixed to the titles. On the Dehli coins the **ال** is prefixed to the titles very irregularly, one or two having it, the others not.

أبو بكر الصدّيق عمر الخطاب عثمان عقان علي المرتضى

Abu Bakr the faithful witness, Umar the eloquent, Uthman the defender, Ali the chosen.

أبو بكر الصدّيق رضى الله عنه عمر فاروق رضى الله عنه عثمان ذو النورين رضى الله عنه علي المرتضى رضى الله عنه

Abu Bakr the faithful witness, God reward him, Umar the timid, God reward him, Uthman the lord of two lights, God reward him, Ali the chosen, God reward him.

أبو بكر عمر عثمان حيدر. (i.e. Ali).

بصدق ابى بكر بعدل عمر بحياى عثمان بعلم على

By the truth of Abu Bakr, by the justice of Umar, by the modesty of Uthman, by the wisdom of Ali.

بصدق ابى بكر و عدل عمر و بازم عثمان و علم على

By the truth of Abu Bakr, the justice of Umar, the modesty of Uthman, and wisdom of Ali.

بالصدق ابو بكر عدل عمر حلم عثمان علم على

By the truth of Abu Bakr, justice of Umar, meekness of Uthman, wisdom of Ali.

THE TWELVE IMAMS.

The Shiah claim as the only legitimate Khalifs or successors of the Prophet, his son-in-law Ali, husband of Fatima, and their descendants to the number of twelve, the last of whom is to reappear as the Mahdi or Director before the end of the world.

على خير صفوة الله. Ali is the best of God's elect.

CLASSIFICATION OF COINAGES.

In the introduction to the first volume of the British Museum Oriental Coins Catalogue it is said, "These [Mohammadan dynasties] will be arranged in the order proposed and adopted by Fraehn," and in other books on Oriental numismatics reference is made to such and such a class. But Fraehn's arrangement is not to be easily found, although so spoken of as if it were generally known. It is here given in the original form as published in the "Nova Supplementa" of that author, ed. B. Dorn, 1855; and alongside each class is added the name of it as used in this book and in modern books generally, and the volume of the Catalogue of Oriental Coins of the British Museum in which the class is described.

It will be seen that many coinages are not included in Fraehn's list, notably the Kings of Dehli and the Muhammadan States of India. He himself made some appendices, and Dorn, Soret, and others did the same. Mr. Stanley Lane Poole, however, in his "Mohammadan Dynasties," a book of the highest value to the student of Oriental numismatics, adopts an arrangement of the dynasties, after the Khalifs of Baghdad, in geographical order from west to east, i.e. from Spain to India, with certain modifications arising from historical sequence; and that arrangement is one which, probably, will now be generally followed.

This table of classification will also, it is hoped, remove some difficulties as to names or synonyms used by writers; for instance, Chulaguidæ and Hulaguidi for the Ilkhans or Mongols of Persia, Dschutschidæ, Dschudschidæ, and Jujidæ for the Khans of the Golden Horde, Ileki and Eelik for the Khans of Turkistan, Patani for Pathan Kings of Dehli, Sebaktiginidæ for the Ghaznavi or Kings of Ghazni, and Babaridæ for the Moghul Emperors of Dehli.

COUNTER-MARKS.

Counter-marking is not very common on Musalman coins except in a few classes. It was used to adapt for a Sultan or ruler the coin of a predecessor in the State, or to stamp the coin as genuine or as current in another district than that in which it was at first issued.

On coins of Khusru II, Sassanian, the words جائز , current, and بسم الله are stamped in the margin, and across an Armenian coin الله; these were, no doubt, made to indicate currency amongst the Musalmans.

On large copper coins of Husain al-Din Timurtash, bearing on the obverse a head copied from a coin of Antiochus VII, is stamped on the neck (in one specimen on the nose) نجم الدين, that is, the name of his successor, in whose time, no doubt, the counter-mark was made. On coins of a similar pattern نجم الدين is upon the neck, evidently not a counter-strike, but engraved on the die; these are taken to belong to Najm al-Din himself, from his own die of the pattern of his father Timurtash. On other coins of Najm al-Din we find نجم الدين ملك ديار بكر counter-struck over the نجم الدين just mentioned; this was probably, Mr. S. Lane Poole says, to commemorate an accession to his territory. The name of Kamal al-Din Mahmud محمد كمال الدين is counter-stamped upon the figure of Christ upon a coin of Byzantine pattern of one of the Zanjid Atabegs.

On Timurid coins there are many counter-marks :—

On Timur's coins. بهادر شاه - شاه رخ بهادر

کورگان احمد سلطان عدل - کورگان ابو سعید عدل سلطان -

به بود - عدل سلطان (it is good). On Shah Rukh's.

عدل سلطان بایسنغر غازی ۹۰۱ - (a governor) مسعود عدل سلطان
Baysunkur Ak-Kuyunlid. ۸۹۶ عدل شیراز Yaku
Ak-Kuyunlid. On Ahmad Shah's.

به بود هراة ۹۰۰ - به بود - (a governor) Rustam سلطان رستم کاسان
On Abu Said's.

سلطان عدل مسعود غازی - کورکان احمد سلطان عدل -
ضرب سرورد بخارا ۹۱۱ - عدل سلطان بایسنغر غازی ۹۰۳ -
عدل سلطان یادگار محمد On coins of Husain Baikara (governor).
Note.—The meaning of سرورد is still doubtful.

The following counter-marks are on Shaybanid coins :—

عدل سرورد - عدل سمرقند - ضرب بخارا - ضرب قارشی -
ضرب حصار - عدل حصار - عدل سمرقند - عدل بلخ - عدل قرشی -
ضرب اخسی - عدل شیراز - عدل بخارا - دانکی اردو - عدل کش -
عدل سودار - جور - ضرب میر - عدل لوچک

Most of the places mentioned here will be found in the list of mint towns, but others are uncertain; they are given chiefly on the authority of Tiesenhausen.

A coin of Pir Budak and Yusuf Nuyan, Kara-Kuyunlid, is counter-marked شماخی ۸۲۲; the date is probably an error for ۸۶۶. Rustam, Ak-Kuyunlid, counter-marked coins of his predecessor, Yakub عدل سلطان رستم خان.

On a coin of Ala al-Din, Karaman Amir, is a counter-strike لله; and one of Muhammad Artin, Amir of Mantasha, is counter-struck with a Solomon's seal, a mark used by the Othmanlis.

سلیمان is counter-struck on a coin of Ghazan Mahmud, Mongol of Persia, and بخ on Jalair coins. One of Shaykh Hasan Buzurg and many of Shaykh Oways bear counter-marks, - الله حسبی

خوى - قزوين - طوسان - سلطانية - خجوان - حسين خان -
 - باران, some having on them both one of the mint-names and also
 . الله حسبي

These counter-marks are of various shapes, round, oval, multi-foil, etc., having usually within double lines the words in small letters arranged in a pattern, and are often hard to decipher.

The coins of the Native States of India often bear marks of stamping with punches of various shapes, known in that country as shrof-marks; they are made by money-changers, صراف, sarraf, commonly called shrof, in the bazaars as private marks for currency purposes, and also to see whether the coin is really all silver or gold or a baser metal coated over, and they correspond pretty much to the chop-marks made on dollars in China. Counter-marks are not common on them, but occasionally श्री or some other Nagari letter or two may be seen.

PROPER NAMES.

The names of Musalmans are not easy to understand, and are often a difficulty to the student. The following, taken mainly from an article on "The Proper Names of the Mohammadans," by Sir T. E. Colebrooke (Royal Asiatic Society's Journal, 1879), will explain the system.

The different classes of proper names are seven :—

1. The علم, Alam, is the proper name of the individual. Among the Musalmans there are no family names as in Europe, and the Alam corresponds nearly with the Christian name, as it is given soon after birth or at circumcision, and is that by which he is familiarly known.
2. The كنية, Kuniyat, is the name of relationship, as when a person is described as the father, son, mother, or daughter of some other person or object.
3. The لقب, Lakab, includes titles of honour, religious and political, and terms of reproach, descending even to personal defects.
4. الانساب, al-Ansab, or اسم نسب, Ism-i-nisbat, name of relations as to origin, kindred, land of birth or adoption, religion, trade or business, personal or other peculiarities, etc.
5. العلامة, al-Alamat, certain titles borne by princes which are not reckoned among the personal appellations, but appear in diplomas or in the heading of State documents.
6. The عنوان, Anwan, titles of honour applied to others than princes.
7. The مخلص, Makhalas, or تخلص, Takhallas, the name of fancy assumed by poets.

The Alam are arranged under three heads, viz. :—(1) Names borne by Muhammad's own family or his companions, including the name of the Prophet himself in its threefold form (محمد

the praised, أحمد the most praised, and محمود the praised), فاطمة - عباس - فاطمة, the first four Khalifs and the twelve Imams. (2) Names of patriarchs and prophets mentioned in the Koran, such as آدم Adam, شيث Seth, ادريس Enoch, نوح Noah, سام Shem, ابراهيم Abraham, اسمعيل Ishmael, اسحق Isaac, يعقوب Jacob, يوسف Joseph, شعيب Jethro, موسى Moses, هارون Aaron, ايوب Job, لوط Lot, طالوت Saul, داود David, سليمان Solomon, زكرياء Zechariah, عزير Ezra, الياس Elias, عيسى Jesus, يحيى John, هود Hud, عمران Imran. (3) عبد الله, servant of God, and its synonyms, i.e. servant of God under any other of His names, e.g. عبد الرحمن - عبد الكريم - عبد القادر - عبد العزيز. Some of these are also included under Lakab.

The Kunyat might be translated as the surname or cognomen ; it is made up generally of ابو father, or ابن son, with the name of the father or son, as ابو اسحق - ابن يوسف - or with some other word making a sort of character name, sobriquet, or nickname, such as ابو حفص father of a young lion, ابو فتح father of victory. Under this class come such surnames as Babar, Arghun, Aghlib, Arslan, Timur, and others.

The Lakab, or honorary title, is applied either in the form of a compound, of which those expressive of zeal for the faith or of political importance are the most common, or by a single word or epithet, like the Augustus, Pius, or Felix of the Romans. The Lakab is largely used upon coins, and ruling princes are more known by it than by their Alam or Kunyat. A list of those found on Musalman coins is given below, and as a help in attributing coins the class or dynasty in which the particular title was used is added.

The al-Ansab and the Takhallas need not be considered with regard to coin-legends, but the al-Alamat and the Anwan are of much interest in numismatics, as the kingly titles are in many cases characteristic or peculiar to the dynasty ; a list of them is therefore given of a similar kind to that of the Lakab.

LIST OF THE KHALIFS OF BAGHDAD AND EGYPT.

The names and dates of the kings of the many dynasties who issued Musalman coins will be found in Lane Poole's "Mohammadan Dynasties" and in the volumes of the British Museum Catalogue. A list of them would be too long to be given here, but as the names of the Khalifs of Baghdad and of the Egyptian Khalifs are upon the coins of many dynasties who acknowledged the authority of the Khalif, more or less, and the name often helps to fix a doubtful date, the following may be useful.

Umayyad Khalifs.

POETICAL LEGENDS.

The legends on coins in the Persian language are often in verse, called *بیت*, couplet, distich. Sometimes they are in a double couplet. Owing to the way in which the words are arranged to bring the verse within the compass of the area, they are difficult to make out, so a fairly full list of them is given below, with translations, the latter being those in R. S. Poole's "Shahs of Persia," S. Lane Poole's "Moghul Emperors," L. White King's "Barakzai," M. Longworth Dames' "Durrani Dynasties," and C. J. Rodgers' various writings.

The verse begins most often, as is the case too when the legend is not in verse, at the bottom, and is to be read upwards, as (*a*) Persian Shah Nadir Shah No. 2; sometimes at the top, as (*b*) Persian Shah Mahmud No. 2; sometimes at the second line from the top, as (*c*) Persian Shah Ashraf No. 2, or lower still, as (*d*) Ashraf No. 3: in these two, (*c*) and (*d*), it will be seen the reading is first upwards for the first verse and then downwards for the second. In all these examples, too, the words or parts of words are not consecutive in the way given in the couplets as written out and as the metre and rhyme require, but are placed or divided in a fanciful way. Often one verse of the couplet is on the obverse and the other on the reverse of the coin, as (*e*) Jahangir No. 22, which begins at the top of the obverse and bottom of the reverse. (*f*) The double distich on the five muhr piece of Jahangir No. 7 gives an example of several of these difficulties on one coin.

Shahs of Persia.

ISMAIL I.

ناد علیا مظهر العجائب
تجدده عوناً لک فی النوائب
کل هم و عم سیاجلی
بولایتک یا علی یا علی یا علی

Call upon Ali, the manifestor of miracles;
Thou shalt find him a help unto thee in adversities.
All care and grief shall vanish
By thy holiness, O Ali, O Ali, O Ali.

ISMAIL II.

زمشرق تا بمغرب گرامام است
علی و آل او مارا تمام است

If an Imam there be between the East and West,
Ali alone with Ali's house for us is the best.

ABBAS II. (1) بگیتی سکهٔ صاحبقرانی

Lo! at this time throughout the world imperial money came,
 Struck by God's grace in Ali's watchdog Abbas Sani's name.

SAFI II, SULAIMAN. (1) ز بعد هستی عباس ثانی
 صفی زد سکهٔ صاحبقرانی

Since Abbas Sani from the world is passed away,
 Safi (the second's) money has imperial sway.

(2) بهر تحصیل رضای مقتدای انس و جان
 سکهٔ خیرات بر زر زد سلیمان جهان

For the sake of winning grace of him who men and genii leads,
 The age's Solomon struck golden money for the people's needs.

(3) سکهٔ مهر علی را تا زدم بر نقد جان
 گشت از فضل خدا محکوم فرمانم جهان

Since on my soul I struck the stamp of Ali's love,
 The world obeyed my rule by grace of God (above).

HUSAIN. گشت صاحب سکه از توفیق رب المشرقین
 در جهان کلب امیر المومنین سلطان حسین

Money he struck by the grace of the Lord of East and
 West, the twain

Everywhere, dog of the Prince of the Faithful's shrine,
 Sultan Husain.

طلا و افتاب نصرة از فیضش منور شد

In the exalted name (Ashraf) of sun and moon coin was made
from gold.

Gold and the sun of victory by His grace were made bright.

(This is an unsatisfactory couplet, read conjecturally
by Dr. Rieu from a single coin, on which there is

apparently another اشراف or شراف which he has not included in it.)

NADIR. (1) سکه بر زر کرد نام سلطنت را در جهان
نادر ایران زمین و خسرو گیتی ستان

By gold in all the earth his kingship shall be famed,
Phoenix (Nadir) of Persia's land, world-conqueror,

CHRONOGRAMS.

The Abjad.

The تاريخ, chronogram, composed by means of the Abjad system, is but seldom found on coins, although it is commonly used to record dates in MSS. and inscriptions. The Abjad, so called from the first four letters ا ب ج د in its table, is an arrangement by which each letter of the Arabic alphabet represents a number in the following scale:—

ا = 1	ك or گ = 20	ر or ژ = 200
ب or پ = 2	ل = 30	ش = 300
ج or چ = 3	م = 40	ت or ٹ = 400

The date is found by adding together the value of the letters composing the word or words indicated, as will be seen in the following examples.

On a coin of Fakhr al-Din Kara Arslan, Urtukid of Kayfa, there is alongside the head on obv. سنة ثنو. ث = 500, ن = 50, و = 6, i.e. 500 + 50 + 6 = 556, or سنة ٥٥٦ of Hijra.

A coin of Nadir Shah of Persia has on its obv. a couplet and date ١١٤٨, and on rev. arranged in Tughra form بتاريخ النخیر By the Tarikh, "Whatever happens is best."

ا ل خ ي ر ف ي م ا و ق ع
70 + 100 + 6 + 1 + 40 + 10 + 80 + 200 + 10 + 600 + 30 + 1 = 1148.

One of the varieties of the Muhr of Jahangir the Moghul emperor, representing him as seated with a goblet in his hand, has on the obv. this couplet:—

قضا برسکه زر کرد تصویر
شبيه حضرت شاه جهانگیر

Destiny has drawn on money of gold
The portrait of His Majesty Shah Jahangir ;

and on the rev. :—

حروف جهانگیر و الله اکبر
ز روز ازل در عدد شد برابر

The letters of Jahangir and Allahu Akbar's
Are equal in value from the beginning of time.

This latter couplet is an anagram rather than a chronogram, but is to be made out by the Abjad, and therefore is noticed here.

ج ه ا ن گ ي ر
200 + 10 + 20 + 50 + 1 + 5 + 3 = 289.

ا ل ل ه ا ک ب ر
200 + 2 + 20 + 1 + 5 + 30 + 30 + 1 = 289.

Tipu Sultan of Mysore, not content with the Abjad, introduced another system, wherein the value was given to each letter according to its position in the Arabic alphabet. This was called the *Abtas*, from the first four letters in it, and was used on Tipu's coins after the fourth year of his reign to give the number of the cycle year, as will be described under "Cycle Years."

The Abtas.

DENOMINATIONS OF COINS.

Until comparatively modern times no other denominations were put upon Musalman coins than دينار, dinar, on gold; درهم, dirham, on silver; and فلس, fals, on copper. Exceptions to this are the fractional pieces of the dinar noticed below.

The دينار, or, as it was spelt in the oldest times and very rarely afterwards, دينار, was of good gold, weighing at the time of the first Khalifs about 66 grains, and being about $\cdot 75$ inch in diameter. Later on the same denomination was used for gold coins of greater or less weight and size. The quality of the metal was almost always fine gold, exceptions being Turkish and Morocco coins, some of which were far from being so. Divisions of the dinar were but rarely noted in words, the legend being هذا دينار, this dinar, whether the coin was a whole, half, or quarter one; but sometimes they were in these terms: هذا نصف, this half, هذا ثلث, this third, هذا الربع, this fourth, without the word دينار following. So they are called a nasf, a thilth, a ruba, in much the same way as we speak of a tiers or a cent. The value of a dinar is now so small in Persia that a copper piece of Nasir al-Din, ا.ه. 1290, of the size of a penny is marked ٥٠ دينار and a smaller piece ٢٥ دينار.

The درهم is the general name for a silver coin, as the دينار is of gold. It corresponds to the drachma, and when used as a weight should equal 48 grains. But silver coins having the name dirham on them vary much in weight and size, and although half and double dirhams are not uncommon, they are not so denoted in the legends they bear. The character of the metal varies very much; some of almost all periods is of very poor quality. A plural form of the word is seen on a Morocco coin, عشرة دراهم, ten dirhams. On some coins of the Dehli king

Muhammad b. Taghlak is the phrase الدرهم الشرعى فى زمن, The dirham legal in the age.

فلس or فلوس is the ordinary name for the copper or, in a few cases, bronze coinage. The plural form فلوس is often used in a general way as 'a falus.'

Besides the above denominations several special ones must be mentioned.

The nomenclature of the Turkish coinage is difficult to comprehend; the changes have been so many and various. The denominations are not, however, denoted upon the coins, so an account of them need not be given here; but some have their value given; thus, ت and ش with ciphers above them represent so many piastras or ghurush, and پ stands in the same way for paras.

The coinage of Persia has much changed in nomenclature during the last 200 years, but none of the names are upon the coins except اشرفى, Ashrafi, and تومان on gold, and the دينار already referred to on copper and on silver. The autonomous copper coins of Persia, too, are nearly all marked فلوس. The curious wire coins called Larin, from Lar, a Persian district at the head of the Persian Gulf, where they were produced, were between 200 and 300 years ago the chief currency of the traffic between the Western India coast and that Gulf, so much so that they became a standard of value in the Konkan and Dekkan, and were made there also, the Adil Shah dynasty of Bijapur adopting the pattern. The coin is a piece of silver wire of the size of a crow-quill, and from five to six inches long, doubled on its middle, and struck at the folded part with a stamp on which was some Persian legend, but only three or four letters of the stamp are upon any Larin, and the legend has not been made out beyond - ضرب - عادل - سلطان. شاه. The source of issue of the Larin is not known, nor its origin. Probably it was found to be a convenient form of money for carrying about, as they could be so easily stuck into the folds of the turban or waist-cloth, and in that way too be

concealed in case of trouble in those piratical times and regions. About Ceylon they are often found bent up in the form of a hook, and are known in those parts as the 'fish-hook money.'

Gold pieces of Khwarizm and of Afghanistan are called tilla; the name, however, is not put upon the coins except in a part of the legend, as *به سیم و طلا*, in silver and gold.

The words *شاهی* and *سکه*, meaning coinage or currency, are very common upon the coins of India and the neighbouring countries, the former word especially so, and often in the phrase *سکه مبارک*, auspicious coinage.

In India the Musalman coinage began with adaptation of the Hindu currency it was to replace, as will be seen by the early coins of the Dehli kings who introduced the tankah, *تنکه*, as the standard in both silver and gold, of the weight of about 174 grains in each metal, and the *kani* *کانی* $\frac{1}{4}$ of a tankah, and equal to four fals. These words are found, but rarely, on coins of this class. In the reign of Sher Shah, A.H. 946-952, came into use the silver rupee, *روپیه*, of 178 grains weight, which with little variety in weight has been the standard coin of India to this day, the gold piece being the *mehr*, *مهر*, muhr, and the copper the *dam*, *دام*. The Emperor Akbar, with his other reforms, instituted an elaborate coinage with great varieties of value and of shape, each variety having a special name, but as none of these names, except those of some of the copper, are found on the coins, they need not be mentioned here. The muhr and the rupee, however, remained the standard. On the copper coins of Akbar we find several denominations given, *تانکی*, *فیلوس*, *تانکه*, with their divisions, *نیم* half, *چهارم حصه* fourth part, *هشتم حصه* eighth part, and *شانزدهم حصه* sixteenth part, and their multiples *دو* and *چو* (in Hindustani); the *دمری* *damri*, the *نیم دام* half-dam, and *نصفی* also meaning a half-dam. On the copper coins of Akbar's son Jahangir we find *روانی* *rawani* and *رائج* *rai*, both words meaning current coin, and their half *نیم*, the former corresponding in weight with the tankah, the latter with one-eighth of a tankah.

The gold coin called نشار nisār, was made for the purpose of distribution on the occasions of great festivals, such as State processions or at marriages, when they were scattered amongst the crowd. They are usually somewhat thinner than the coins of currency, and are marked with the word نشار. The custom of scattering coin on great occasions is still kept up in the East, but the pieces for the nisār are usually now only of very thin gold, little more than gold-leaf. Also there are the large handsome gold pieces of 200, 100, 50, and 10 muhrs of Akbar and his three successors, which were, no doubt, not for currency use exactly, but for presentation in the way of honour from the emperor or offered to the emperor or king, for tribute or acknowledgment of fealty, نذرانه, nazarāna as it is called.

Under the East India Company the rupee remained the standard, and its fineness and weight were fixed. So it has been since. Gold muhrs of the value of at one time 16 and at others 15 rupees have been struck, with half, third, quarter, eighth, and sixteenth of muhr gold pieces, at various dates, but the issue of a gold currency was only temporary. Some were made in imitation of the Dehli emperor's coinage, others have the arms of the Company and the legend اشرفی کمپنی انگریز بہادر Ashrafi, or gold coin of the Honourable English Company. In 1835 and 1854 the lion and palm-tree muhr and double muhr, marked دو اشرفی - یک اشرفی, were issued, and in 1870 a 10 rupee gold piece of Queen Victoria.

In silver, besides the rupee, there are its divisions $\frac{1}{2}$, $\frac{1}{4}$, and $\frac{1}{8}$, marked respectively دو انہ - چہار انہ - ہشت انہ. The copper money is the انہ ana, 16 to a rupee, the پيسا paisa, 4 to an ana, and the پائی pai, 3 to the paisa. The ana is but a money of account, the copper coins being the انہ نیم half-ana, the پيسا or quarter ana, and the پائی with its multiples چہار پائی and دو پائی.

But in Southern India the Hindu system of currency, which had remained unchanged during the time of the Musalman power, continued to be in use for a considerable period under the East India Company. In gold the ہون hun, or pagoda, and double pagoda

دو ہون, one being marked as *پہولی ہون* flowery pagoda. In silver the *ہون نیم* and *پاو ہون* half and quarter pagoda, the *فلم* fanam, *دو فلم* and *پنچ فلم*; and in copper the *فلوس* falus, and the *کاس* kas. The money table being 20 kas = 1 falus, 4 falus = 1 fanam, 42 fanam = 1 pagoda or hun. But owing to attempts made by orders to equalize the currencies of the Presidencies, the relative value of the coins became altered, and we have copper coins of Madras with a variety of legends stating their value, such as *اےن چہل کاس است* this is forty kas; others of twenty, ten, five, two and a half, and two kas of a like character; and others bearing their relative value, such as *دہ کاس دو فلوس است*, *پنچ کاس یک فلوس است*, and *بیسست کاس چہار فلوس است*, when 5 kas were equal to 1 falus. The coins bearing the following inscriptions were proofs not made current.

Coin of the Kunpani (Company), *سکہ کونپنی ۱۷۹۳ عیسوی*
1793, Christian era.

دو فلوس ہانربل کمپنی ۱۸۰۱ عیسوی

This coin, three falus, of the Honourable Company, is one little fanam, 1807, Christian era.

The Native States of India which owed allegiance to the Moghul emperor, usually coined silver in the name of the emperor, and copper of their own style, often of irregular shape and bearing a stamp of some figure or device without a legend. The common name for them was 'dub.'

The coinage of the Native States of India is a difficult but interesting subject. The legend on the silver is usually a part, sometimes but a small part, of the coin-legend of one of the later emperors, without date or mint place; moreover, the die was generally a good deal longer than the coin to be struck, and consequently there is but a portion of this imperfect legend on any

one piece. There are almost always marks or symbols which were intended to be indicative of the mint-place or State, and sometimes they are so, but too often the same symbols were used at different times by more than one State, and a great number of the coins remain still unassigned. The money-changers and dealers in India know them generally by some nickname, but care and know little as to what State they are the coinage of. During the last twenty years or so the chiefs of many States have adopted coinage of a modern pattern struck from dies made in England, usually bearing some figure as a characteristic mark; thus, there is the horse's hoof and fetlock for Baroda and the sun-face for Indore.

Tipu Sultan of Maisur had a coinage of muhrs, rupees, and paisa or kas, but gave new names to them in the 5th year of his reign. These names appear on some of his coins, and are as follows :—

Gold.—فاروقى for muhr, صدیقی for half muhr, and احمدی for pagoda.

Silver.—عابدی for double rupee, امامی for rupee, باقری for half rupee, جعفری for quarter rupee, خضری for one-eighth rupee, کاظمی for one-sixteenth of a rupee, and حیدری for one thirty-second of a rupee.

Copper.—عشمانی and مشتری for double paisa, زهره or زهرا for one paisa, بهرام for half paisa, اختر for quarter paisa, and قطب for one-eighth of a paisa.

The names were no doubt derived for the most part from the names of the Prophet and the Imams. احمد one of the names of the Prophet himself, ابو بکر صدیق the 1st Khalif, عمر فاروق the 2nd Khalif, حیدر علی the 1st Imam, امامی Imams, زین العابدین - محمد باقر - جعفر - موسی کاظم the 4th, 5th, 6th, and 7th Imam, خضر a Prophet who is supposed to have discovered the Water of Life, عثمان the 3rd Khalif, مشتری the planet Jupiter, زهره Venus, بهرام Mars, اختر a star.

Travancore is a Hindu State, and has still a Hindu coinage, but there are Hindustani words in Persian characters on a few of the coins, viz., *پاوروپيه - نيم روپيه* muhr, five rupees, *پاوروپيه*. The money table, according to Mateer, is:—*Copper*: 16 kas = 1 chuckram. *Silver*: 4 chuckram = 1 fanam; 7 fanam = 1 rupee. *Gold*: Panam of various sorts = from $4\frac{1}{2}$ to 7 chuckram; rasi = 10 chuckram; varahan = $52\frac{1}{2}$ fanam.

Kutch and Kathiawar have a special currency, the standard for which is a small silver coin called a kori. The denominations are:—*Copper*: *ترانبیه* tranbiya; *دوکطه* dokda = 2 tranbiya. *Silver*: *کوری* kori = 24 dokda. The word is dokta on the coins, but is really dokda.

On coinage of the Malay Peninsula and Archipelago we find some other denominations. Native States have the *مس* mas, in gold, the *کفخ* kapang, the *کاس* kas, and the *فلوس* falus, in copper. A ducat of the Dutch East India Company, written in Malay *کمفنی وندیس* and *کمفنی وندوی*, and of the Netherlands Government, is called *درهم* dirham, a *دویت* duit, and a rupee *روثیه*, with divisions of the rupee of $\frac{1}{2}$, $\frac{1}{3}$, $\frac{1}{4}$, and $\frac{1}{5}$ in Malay (see p. 6).

A Java rupee of the English East India Company is marked *سکه کمفنی هنگلیش*, coin of the Henglish Company, a Fort Marlborough rupee is called *اواغ کمفنی دوا سوکو*, money of Company two soko, and there are also *کفخ* and multiples of the same.

A soko corresponds to a quarter dollar. A kapang is a small copper coin of which 400 equal a Spanish dollar.

The small currency of these parts was, and still is, made of tin, or of pewter largely composed of that metal, which is the commonest one there, the tin-mines of the Peninsula and neighbouring islands being the source of supply of it in the East. The Portuguese made every endeavour, early in their traffic with Sumatra and the Peninsula, to get the trade and to control the

mines, and the Dutch were not slow in doing the same in the islands where their possessions and influence lay. Following on this the Portuguese Government in the sixteenth century made pewter, or tutenag coins for currency in Western India, and as it became recognized and acceptable for trade, the English Government made tutenag coins early in the eighteenth century for use in the same parts of India, in very close imitation of the Portuguese coinage. There are also some rare coins in this metal struck in the name of the Dehli emperor Shah Jahan, made probably at Surat.

Another denomination is to be found on a coin of Zanzibar, viz. ريال real.

On some coins of Dehli and Bengal kings, instead of the denomination the word الفضية the silver (coin), is used.

PLACE AND TIME OF MINTAGE.

The usual legend about the striking of a Musalman coin is *بسم الله ضرب هذا الدينار [درهم]* In the name of God this dinar (or dirham) was struck, followed by the name of the mint place and the date. Instead of the word *ضرب* on some Murabit coins is *امر بضرب*, ordered to be struck; on some Dehli and Gujarat coins, *دار الضرب*, place of the striking; on other Gujarat ones, *ضربت*, struck; and on a Great Kaan coin, *بدار الضرب*, at the place of striking. On some Nasrid pieces *طبع*, struck, and on some of the Norman kings of Sicily *عمل*, made, are used instead of *ضرب*.

The following phrases are used with reference to the time of the striking:—

In the days of the state or empire. *بايام دولة - في ايام دولة*

In the days of the king. *في ايام الملك*

في ايام دولة المولى السلطان

In the days of the empire of the Lord Sultan.

In the time of. *في عهد*

At the date. *في التاريخ*

Under the empire of the Lord Sultan. *في دولة المولى السلطان*

In the time of. *في زمان - في الزمان - في زمن*

In the time of the Imam. *في زمن الامام*

By order. *عن امر*

Under the governorship. *في ولاية*

By authority of the Amir. *مما امر به الامير*

The mint name had the preposition *ب*, in, attached to it on the older coins, but not often on the later ones; for instance, *بواسط* in the time of the early Khalifs and *واسط* in that of the Mongols of Persia. The article *ال*, the, is prefixed to some names and not to others, and a few mint names are sometimes

written with and sometimes without it, and that too even at about the same date.

Before or after the mint name there is often a word or two meaning place, city, port, etc , بندر - بلدة - مدينة , or expressive of quality, title, or condition, as مقدس المبارك the blessed, holy, مدينة محفوظه the new ; or both, such as guarded city, بلدة ضيبه the good city, بندر مبارك the blessed port. These are called the titles of mint towns, and a list of them follows that of the mints, showing the places to which the title is given in each case.

The List of Mint Towns has been compiled from the one in Soret's "Numismatique Musalmane," with the addition of such other places as have been found in numismatic writings since that book was published. For the purpose of greater accuracy as to the geographical position of the towns—such general descriptions as "in Irak Arabi," "in Khurasan," not being satisfactory—the latitude and longitude are given when they have been ascertained.

Some names have not been located, although they are mentioned in Yakut's "Mu'jam al-Buldan"; in such cases a few words of description by that author are quoted. A few more yet remain uncertain: some of them probably have disappeared or sunk into insignificance; others may have been new names given to places on their capture by a Musalman king, but since forgotten; and others are most likely misreadings. When the mint name has been noticed by only one writer his name is added, in brackets, as the authority for including it in the list; all the other mint names have been given by more than one writer. The class of coin upon which the mint name is found follows the geographical description, and then the title or titles of the town, which are given as prefix or suffix according to whether they precede or follow the name.

The spelling of the names is not, as will be seen, always the same; Arzerum is an instance of this: أرضروم - ارزروم - ارزروم - ارز الروم. Misreadings may account for this sometimes, but there are misspellings and variations in spelling some of the names on the coins.

ERAS.

The dates on Muhammadan coins are, as a rule, given according to the Hijra Era, but other eras are also used.

Hijra.

The era dates from the flight of the Prophet Muhammad from Mecca to Medina, which took place on the 15th July, 622 A.D. The first day of it corresponds with the 16th July of that year. This era is a purely lunar one of 12 lunations, and to make it accord as nearly as possible with the moon's motion a day is intercalated at the end of 11 of the years in a cycle of 30: thus the mean length of the year is $354\frac{11}{30}$ days. The following is a very simple 'rule of thumb' by Dr. James Burgess for converting dates of the Hijra to the Christian (Julian): "From Hijra date deduct 3 per cent. and add 622 for the date A.D." As each year is shorter than a Christian year it begins earlier in the season than the preceding one. The following Table shows the day of the month of the Christian year upon which each Hijra year begins up to 1325 A.H. It is usual to give as the corresponding year that one in which the greater part of the Hijra year is included; for instance, A.H. 700 began on the 16th September, 1300, and ended on the 5th September, 1301, that is, $3\frac{1}{2}$ months in 1300 and $8\frac{1}{2}$ months in 1301. The latter A.D. year therefore is the corresponding one, unless, of course, one of the early months of the Hijra year is in question. Dr. Forbes gives this rule for working out the corresponding date: "Express the Muhammadan date in years and decimals of years; multiply by .970225; to the product add 621.54, and the sum will be the precise period of the Christian Era." Another rule is that given by Soret: "Date of Hijra multiplied by 97, to the product add 621.84, separating by a decimal point the last two ciphers of the product."

Example:—1st day of 700 A.H. $700 \times 97 = 67900$. $67900 + 621.84 = 1300.84$, that is, 1300 and .84 of the year, which corresponds with the middle of September.

Commonly there is no indication on the coins of the date being the Hijra one, but it is occasionally so stated, as *بالمهجرة - هجرة*. - *بالمهجرة - هجرة قدي*. On two coins of Mongols of Persia, which bear also the Khanian date, the word *هلاية*, lunar, is added to distinguish the date in that way from the Khanian, which was a solar era.

Tipu Sultan, of Maisur, in the year 1201 A.H., i.e. the fifth year of his reign, instituted a new era for use in his kingdom, dating from the birth of Muhammad *مولودى محمد*, instead of from the year of the flight. The years were Luni-Solar. The date of the birth of the Prophet is generally given as 570 A.D., but it is not certain whether Tipu counted from that time or about a year later, as was held by some to be correct. On a coin of the fourth year of his reign the date is given *سنة هجرى ١٢٠٠*, and on one of the fifth year of his reign the date is written *٥١٢١*, that is, 1215 of the new era and in the new way of arranging the ciphers (see p. 7). The difference of but 14 years between the dates according to the two eras, although the period between the birth and the flight of the Prophet was some 52 years, is to be accounted for by the Muludi years being longer, luni-solar, than the Hijra, lunar, ones.

Khanian.

The Khanian Era was established by Ilkhan Ghazan Mahmud on 1st Rajab, A.H. 701, but it is not found upon coins until the time of his nephew, Abu Said, some 33 years later, and on the coins of one or two of Abu's successors. The era was a solar one, and is written *الخانانية*. There is no difficulty in computing the corresponding year in the Hijra and Christian Eras, for the year 1 of Khanian is 701 A.H. and 1301 A.D.

Christian.

Dates in the Christian Era are found on coins of Native States of India, E.I. Company, and Straits Settlements, also on some Christian Syrian coins in Arabic characters. It is usually indicated *سنة عيسوى* or *عيسوى* only, but on one of the Syrian it is put as *سنة الماتجسد المسيح*, year of the Incarnation of the Messiah.

Ilahi.

The Tarikh Ilahi was established by the Emperor Akbar in the 30th year of his reign (A.H. 992), and began with his reign on 5th Rabi al-Sani, A.H. 963, or 19th February, 1556 A.D. The months and days are Solar, without any intercalations. The names of the months and days are the same as the old Persian ones. The months have from 29 to 30 days; there are no weeks, but each day of the month is distinguished by a different name.

The era was used by Akbar, Jahangir, and Shah Jahan, often together with the Hijra date. It is written on the coins *الهى*.

Samvat.

The Samvat or Era of Vikramaditya began at B.C. 57. It is luni-solar with intercalation. To convert Samvat into Christian years it is necessary only to subtract 57 from the date. The era is used on coins of some of the Native States of India, generally, when the legend is in the Arabic character, with the Hijra date also. It is written *سميت*.

The Spanish.

The Spanish, called also the Era of the Cæsars, is reckoned from 1st January, B.C. 38, being the year following the conquest of Spain by Augustus. It is found on a bilingual coin of Alphonse VIII of Spain, and there called *الصفى*.

CYCLE YEARS.

Sultan Tipu, of Mysore, in the first or second year of his reign, adopted, in addition to the Hijra dates, the Hindu cycle of sixty years, each distinguished by a particular name, which was in use in his dominions and known as the Tamil Brihaspate Cycle. But instead of the original names of the respective years, he gave them new ones made up of letters which by the Abjad system would denote the number of the year in the cycle. The second year of Tipu's reign, A.D. 1783-84, was the 38th of the current cycle, which began in A.D. 1747. That year he named ا ز ل ($1 + 7 + 30$), the next year ج ل و ($3 + 30 + 6$), and the next د ل و ($4 + 30 + 6$), and these three names preceded by the word سال year are found upon coins of the Sultan of the 2nd, 3rd, and 4th years of his reign, and dated 1198, 1199, 1200 Hijra respectively. When, however, in the 5th year of his reign Tipu altered his era from the Hijra to the Muludi (see p. 204), and replaced the Abjad system by the Abtas (see p. 116), he gave other names to the years which would indicate the number of the year in the cycle according to the latter system, and these we find on his coins from his fifth regnal year, such as شا ($40 + 1$), س ا ر ا ($30 + 1 + 10 + 1$), etc.

The names احمد and احد were given arbitrarily, in both systems, to the first and second years, because no words sufficiently short could be assigned to them to express 'one' and 'two.'

DATES.

Ordinarily the date of striking of the coin is preceded by the word سنة year, sometimes سنة في in the year, but there are some variations from this. Some Samanid coins have بسنة of the year, some Dehli and others سنة هجرة , Turkistan سنة من هجرة النبي year in the Hijra of the Prophet, Bhopal سنة هجرى قدسى year of the holy Hijra. The word عام, year, is used instead of سنة on some Spanish and African coins. When the Christian date is given the form is سنة عيسوى, when the Samvat سميت .

On some coins the phrase سنة في شهور سنة, in the months of the year, is used; on some others the name of the month of issue is stated, سنة في شهر, followed by the name of the month of the Hijra year. When the Ilahi year is given on the coins of Akbar and his successors the month of the old Persian calendar is employed with the Persian word ماه month, as الهى ماه ابان, Ilahi month Aban. Very rarely the day of the month is added by a cipher, or in words as in the following legend on a coin of a Governor of Bengal, سنة في التاريخ العشرين من شهر الربيع الاخر سنة, on the date the twentieth of the month Rabi al-Akhir of the year six hundred and twenty; and on one of Tipu Sultan, سنة في شهر باهارى سال شا, the third of (month) Bahari of the (cycle) year Sha.

Tipu Sultan, on giving to the cycle years new names, which should denote the numerical order in which they stand in the cycle (see p. 206), treated the months of which the year consists in a similar way, but instead of the whole name being taken to express the number in Abjad the initial letter only was made to do so. Afterwards, with the change from the Abjad to the Abtas, it was again necessary to alter the names to suit the latter system. Only one or two of the months have been noted as being on Tipu's coins, but more may be found, and therefore the names are here given.

Names of the Twelve Months in Abjad and Abtas.

No. of Month.	Abjad.		No. of Month.	Abjad.		No. of Month.	Abtas.

The numbers of the 11th and 12th month are made by using the first two letters of the name, and in the Abjad the letters ا (1) and ب (2) are on the right of the letter ي (10), as is usual in writing in ciphers the numbers 11 and 12, whilst in the Abtas the units ا and ب are on the left of the decimal , that is, in the order in which the ciphers were placed, 11 and 21, in Tipu Sultan's system (see p. 7).

REGNAL YEARS.

The year of the reign of the ruler is also usually noted on the coins of the Moghul emperors of Dehli, Afghanistan, Native States of India, Othmanli, and some other series of modern times, but not on the old Arabic.

It is, as a rule, on the other face of the coin to that on which the date is, and in ciphers, except for the first year, which is often written *احد جلوس*, accession or enthronement, is the word used to express regnal year, with or without *سنة* before it. The phrase *سنة جلوس ميمنت مانوس*, in the year of his reign of tranquil prosperity, adopted for Aurangzib, has been a favourite one ever since in the East.

The regnal year is of the same length as the Hijra lunar one, and consequently, beginning each year on the enthronement anniversary, does not change its number on the same day as the latter does, unless, of course, the enthronement was on 1st of Muharram, and so apparent discrepancies occur; for instance, Jahangir was proclaimed Emperor in Jumada, 1014; one half, therefore, of his issue of the regnal year 1 was in 1014 and one half in 1015. But there are many real discrepancies owing to carelessness of the mint masters or die engravers. In the time of Jahangir and Shah Jahan, when the solar year of Akbar's Ilahi Era was being again replaced by the Hijra, there was some confusion, and mistakes were made. The E.I. Company in 1793, in trying to establish a standard currency, ordered that all the rupees coined for Bengal should for the future bear the impression of the rupee of the 19th year of Shah Alam's reign; thus, the *سنة ١٩* was retained on the obverse of the Sicca or 19 San rupee of Murshidabad, whatever the Hijra year might be on the reverse,

until 1835. In a similar way سنة ١٢٦١ was put on the E.I.C. Farukhabad and Surat coins of the Shah Alam pattern, irrespective of the date of issue, from 1805 to 1835.

On some coins of Indian Native States, of the pattern of the Shah Alam rupee, is a جلوس year cipher which is not that of the Dehli Emperor, but that of the Rajah of the State, although his name is not given upon the piece.

On the Othmanli coinage since the beginning of the reign of Abd al-Hamid, ا.ه. 1187, only the date of the year of the Sultan's accession is given throughout the reign, with a cipher, usually above the area of the reverse, indicating the regnal year. It is necessary, therefore, to add the number of the regnal year to the date in order to arrive at the year in which any piece was struck; e.g., all the coins of Mahmud II bear the Hijra date 1223, although he reigned 32 years, and some of them were struck as late as 1254, as is shown by their bearing the regnal year 32.
